**Subject:** comments on the genotoxicity section of the formaldehyde assessment  
**Attachments:** FA-sample rewritten paragraph-MMP.docx; FormaldehydeAppendixdraft070113forREVIEW-cfg-NK-MP-CK combined comments.docx; Comments on the Genotoxicity Section.docx

Hi Sury and Barbara/Andrew

Attached are comments from the genotoxicity subgroup. Catherine and myself want to emphasize that this is a group effort and want to thank everybody for their comments.

I have combined all the comments to make it easy for the author. I had issues with combining the comment bubbles and hence had to re-enter the comments. I have used Catherine's version since she had the most comments and then included other comments with their initials (other than myself) in the front of the comment. I hope everybody is OK with that, hopefully we will have a better method next time around. I think the important thing is that the comments are delivered to the author.

Attached are the following:

- (1) Genotoxicity section (Supplementary material of the document) with comment bubbles.
- (2) Example of reworked paragraphs (Margaret's contribution)
- (3) Comments provided in a written format (in addition to comment bubbles)

If you have any questions, please let us know. Also, if there is anybody else who would benefit from having these comments, please pass them along. I have limited the distribution to authors, assessment managers, co-chairs, genotoxicity workgroup members and the associated managers.

Thank you  
Nagu
